Security system based on Visual & Mechanical coding

# E-2000® security levels

## 1st Security level:

- Color Coding System (Visual coding)

## 2nd Security level:

- Mechanical coding (+ Visual coding)

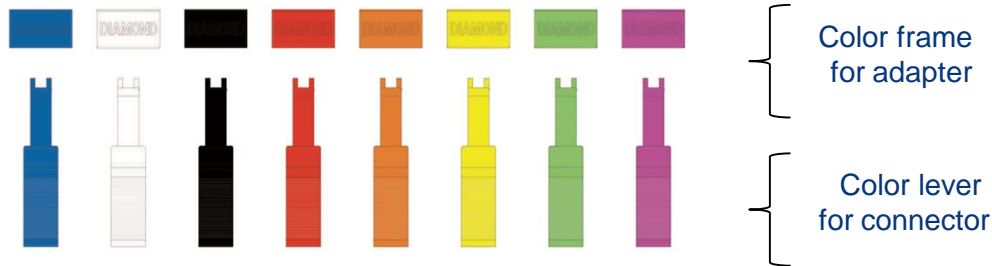

## 3rd Security level:

- Mechanical coding (without thumb-latch)

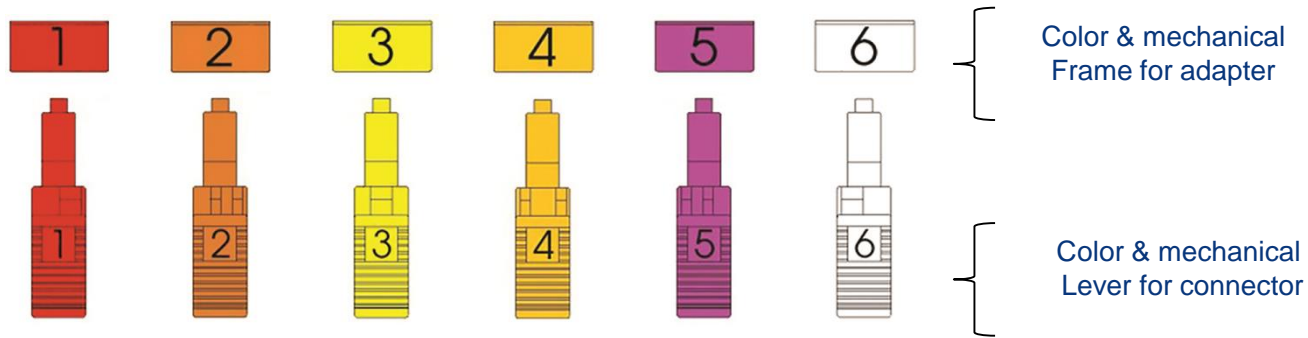

# 1st Security level: Color Coding System (Visual coding)

- 8 Standard colors available (others on request)
- Clear and fast identification
- Color code, can be changed at any time in the field

## 2nd Security level: Mechanical coding + visual coding

- The mechanical coding system involves 6 variants
- Prevents connectors being connected to the wrong adapters

## 3rd Security level: Mechanical coding (without thumb-latch)

- Unlock mechanism. The connector can be released only by adding the lever
- It protects connectors to passive & active devices (switches, surveillance cameras, etc.) against unauthorized access
